des Entreprises (IAE)**

Période de l'année
Semestre 9

En bref

- # **Langue(s) d'enseignement:** Anglais
- # **Ouvert aux étudiants en échange:** Oui
- # **Référentiel ERASMUS:** Gestion et administration

Présentation

Description

This course is an introduction to Digital Transformation (DT) and Digital Marketing (DM). Students will be introduced to foundational concepts underlying the DT and DM principles, strategies, and tactics, as well as the relation between the two main topics of the course.

We will review some basic notions related to digital technologies, such as elementary concepts of Social Network Analysis, mobility, data, hypertext and virality. We will then study Digital Transformation: why and how to engage in such a process, trends and practices, factors of success and failure. Building on this knowledge, we then focus, in the last course, on Digital Marketing and its different forms, as well as on its operational aspects, covering marketing strategies and tactics, content structuring and creation, consumer centric approaches, and satisfaction measurement.

Objectifs

After this course, students should be capable of...

- Understanding and reformulating the essentials of Digital Transformation and Digital Marketing and the relation between them;
- Recognizing the different concepts covered in class through case studies or in real life situations;

- Doing research to deepen their understanding of the subject, aiming to strengthen their capacity to propose creative and proactive alternatives.

Heures d'enseignement

CM	CM	15h
----	----	-----

Pré-requis obligatoires

Bachelor Level in Management (L3 Gestion) and Information Systems and Communication (L3 SIC)

Programme détaillé
