

Research project

ECTS crédits

Composante Sciences Fondamentales et Appliquées

Présentation

Description

The students will spent about 3 days a week on their research training in their chosen field of research. This first project starts in october and runs until the end of the semester S1 (training report, oral/poster presentation).

The ojectives are to introduce the GS-students to research methodologies by :

- * Reading key publications
- * Developing a network of colleagues,
- * Learning the basic experimental and simulation techniques,
- * Learning to write a scientific report,

Heures d'enseignement

Research project	Séminaire / Atelier (de recherche) - TD	10h
