## Présentation

---

### Description

The aim of this seminar is to explore developments to the 3-layered architecture of the sentence posited by the *Principles & Parameters* approach. Thus, we will see how new proposals have “split” the VP, introducing an “agentive” vP level, the much-discussed “split-IP”, with separate aspect, tense, and more controversially, mood projections, and the “split-CP”, which assumes separate Focus, Topic and Force projections in the “left periphery” of the sentence.
